

Policy on Environment and Quality Management

The most important goal of our quality policy is to be able to supply and serve our customers with outstanding quality and reliable products. To maintain and further develop our business model is our main intention, so we constantly develop and optimize our processes.

To achieve the goals above, we operate a high-quality, efficient and controlled integrated management system according to the MSZ EN ISO 9001:2015 standard, which guarantees satisfaction and trust of our customers even in an ever-changing global economic environment.

So that to satisfy our customers in , Our main objectives are the following:

Aims and objectives:

- to meet the requirements of the market
- to meet the requirements and expectations of the customers
- to keep and increase the confidence of our customers'
- to increase the number of our customers and our market share
- to develop relations with our suppliers that are based on mutual benefits
- to comply with applicable laws and standards
- to reduce the noxious, harmful impacts of production on the environment

We are determined:

- to improve competitive, flexible and applicable organizational features
- to develop the existing quality policy at top management level
- to establish the adequate conditions of quality work at all level
- to comply with law and other rules, regulations
- to protect our environment by continuously monitoring and reducing pollution
- to develop all workers' competence and their commitment to quality work

We inspire:

- the performance of an open, dependable and correct business relations
- the development and expansion of the achievements in quality and environments protection
